Queries

It is possible for other people to provide you with a lower marketing budget than we have provided!

Our budget always comes with a reason in which quality or responsibility comes with us, we have to work long term with the clients, it is easy to make money by running low budget or by running poor quality but that is not our motive. Creator and brand both are clients for us, we can never do more or less to one.

Are brands and creators capable of working directly together?

Every brand has tried, or is still trying, but they have to face a lot of problems like creator behavior, content quality, payment frauds etc. In fact, 95 out of 100 brands fail.

The team does not even consist of a large number of members?

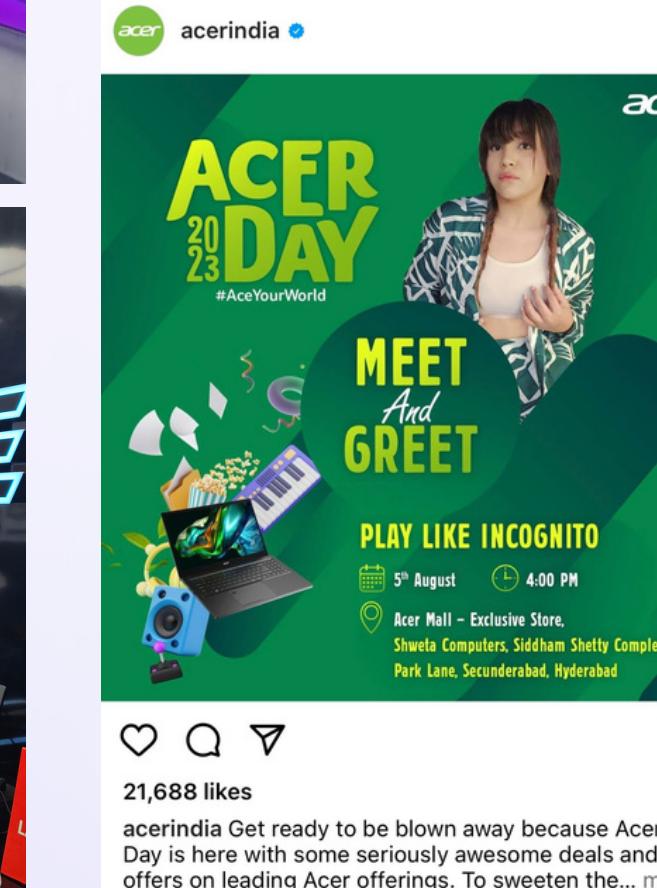

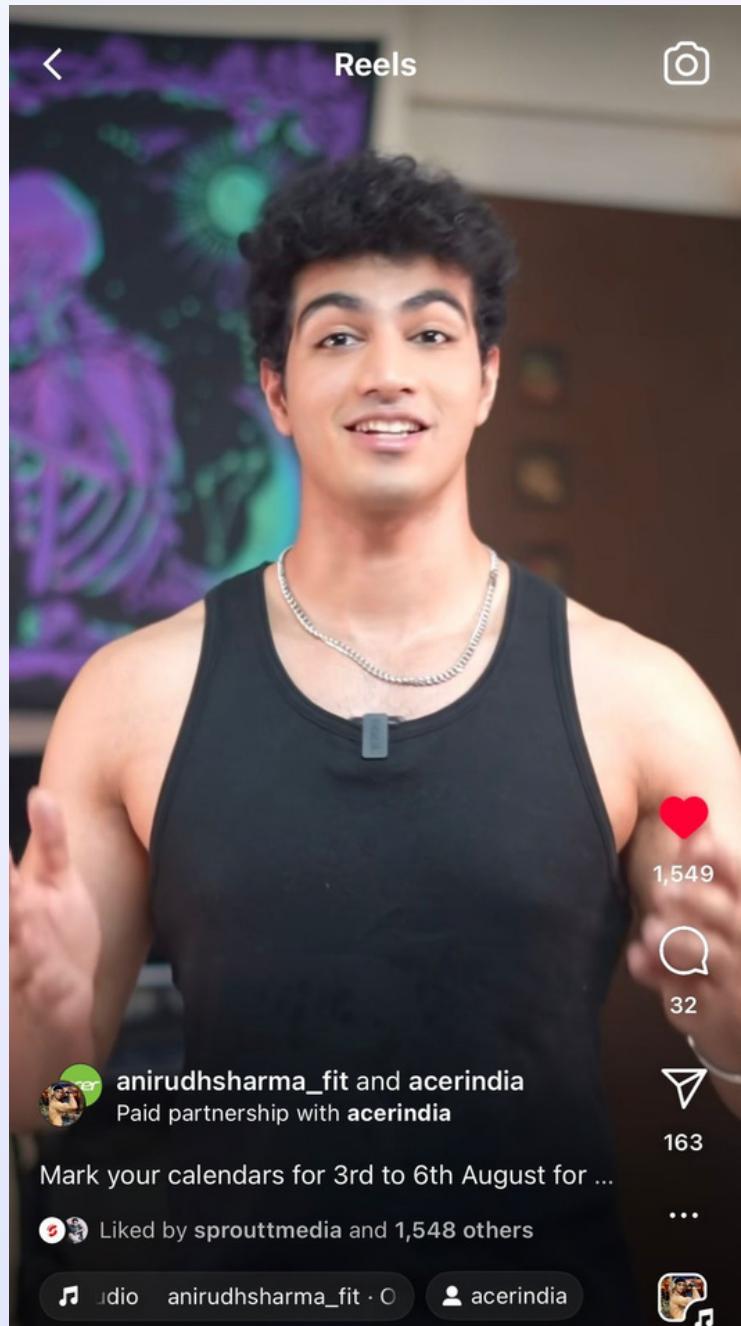

This may be a disadvantage for us at the moment but we also take it as a strength, many brands or agencies have worked with us or will work with us after seeing our work. I hope you will give us a chance to work with you.
